

## VEGAN ADRENAL SUPPORT+

Introducing the next generation of adrenal support. The first, full-spectrum VEGAN formula to target the three critical **Rs** of adrenal health - **Recover** *adrenal function*, **Reset** *the neuroendocrine communication network*, and **Rebalance** *the metabolic response*.\*

# VEGAN ADRENAL SUPPORT+

- Provides a multi-layered approach to support adrenal recovery and resilience by targeting the adrenal/HPA axis, neuroendocrine network communications, and immune-inflammatory systems.\*
- Offers copaiba oil, an essential oil rich in beta-caryophyllene (BCP) and a good source of terpenes, which are stronger activators of the CBD endocannabinoid system than cannabidiols, and generally better tolerated than CBD/hemp oil.\*
- Supports the CBD endocannabinoid system to promote healthy stress responses, without the need for hemp-derived ingredients.\*
- Helps parasympathetic system recovery, circadian reset and neuroendocrine balance, supporting a healthy response to stress.\*

## PRODUCT INFORMATION

### Vegan Adrenal Support+

SIZE: 30 servings. 60 Count

DAILY DOSAGE: 2 vegan capsules

**PREMIUM VEGAN FORMULATION**

## Recover

### 600mg of Ashwagandha

- Supports a resilient adrenal response and healthy cortisol function\*
- Supports central nervous system and neuroendocrine responses\*

## Reset

### 150mg Algal Omega-3/DHA (standardized to 30% DHA)

- Supports healthy activation and resolution of inflammatory processes\*

### 25mg Copaiba Oil [standardized to 10% beta-caryophyllene (BCP)]

- Supports activation of the CBD endocannabinoid system\*
- Supports central nervous system function\*
- Supports healthy immune system response and resolution\*
- Moderates mild fatigue under stressful conditions\*

### 200mg Boswellia

- Supports healthy and balanced function of the CBD endocannabinoid system\*
- Supports a healthy immune system and inflammatory responses\*

## Rebalance

### 50mg Rhodiola + 100mg Eleuthero

- Supports balanced and healthy adrenal system responses\*
- Supports healthy and adaptive responses of the central nervous system\*

## Supplement Facts

Serving Size: 2 vegan capsules  
Servings Per Container: 30

	Amount Per Serving	%DV
Vitamin B6 (as Pyridoxine Hydrochloride)	10mg	588%
Vitamin B12 (as Methylcobalamin)	50mcg	2083%
Magnesium (as Magnesium Citrate)	10mg	2%
Ashwagandha ( <i>Withania somnifera</i> ) Whole Plant Extract (Standardized to 7% Withanolides)	600mg	*
Indian Frankincense ( <i>Boswellia serrata</i> ) Oleo-Gum-Resin Extract (Standardized to 65% Boswellic Acids)	200mg	*
Copaiba ( <i>Copaifera officinalis</i> ) Oleoresin (Standardized to 10% $\beta$ -caryophyllene)	25mg	*
Vegan Omega-3 Powder (from algal <i>Schizochytrium</i> sp.) (Standardized to 30% DHA [Docosahexaenoic Acid])	150mg	*
Eleuthero ( <i>Eleutherococcus senticosus</i> ) Root Extract (Standardized to 0.8% Eleutherosides)	100mg	*
Rhodiola ( <i>Rhodiola rosea</i> ) Root Extract (Standardized to 3% Rosavins and 1% Salidroside)	50mg	*

\* Daily Value (DV) not established

Other Ingredients: Vegetable Cellulose Capsule.

# A CLEAN PRODUCT PROFILE THAT DELIVERS\*

The first adrenal health product designed to provide complete system support for energy, resiliency and healthy responses to anxiousness. This unique formula supports adrenal function and the HPA axis for healthy neuroendocrine system communications, a healthy immune and inflammatory response of the central nervous system (CNS), and a balanced endocannabinoid system.\*

- Promotes adrenal system balance to support a healthy response to stress (Eleuthero and Rhodiola)\*
- Helps to support and maintain balance and resiliency of daily cortisol responses (Ashwagandha)\*
- Provides nutrients critical for optimal HPA axis function and energy (Magnesium, Vitamin B<sub>6</sub> and B<sub>12</sub>)\*
- Supports healthy immune and inflammatory responses of the neuroendocrine and metabolic systems (Vegan Omega-3/DHA, Boswellia and Copaiba Oil)\*
- No gluten, dairy, soy, egg, peanut, tree nut, fish or shellfish
- No artificial flavors, colors, sweeteners, excipients (fillers, coatings, binders), or sugar, and is non-GMO

## 1. **PROBLEM: Up to 80% of Americans report experiencing mild to serious feelings of stress throughout their daily lives<sup>1</sup>**

- More than 90% of Americans have nutrient gaps that contribute to an altered metabolic response, energetics, and hormone imbalance. Poor dietary choices and habits contribute to deficiency in levels of magnesium, B vitamins, and omega-3/DHA levels.<sup>2</sup>
- Nearly 60% of Americans have underlying compromised immune and inflammatory responses due to lifestyle that can lead to poor health outcomes.<sup>3</sup>
- Prolonged states of stress contribute to poor sleep quality, which in turn can accelerate immune responses to a state of unresolved inflammation, contributing to overall sluggishness, loss of energy and attention, 'burn-out' and brain fog.

## 2. **SCIENCE: Imbalance in the adrenal/HPA axis system leads to prolonged time to recovery and triggers underlying inflammatory responses**

- The adrenal/HPA axis plays a central role in a balanced and synchronized stress response, including stress hormones. With repeated and frequent feelings of anxiousness, the adrenal system may become dysfunctional by losing the ability to have a resilient and appropriate cortisol response. When this system loses its ability to recover, sensations of tiredness, loss of energy, prolonged feelings of anxiousness and stress can be experienced.
- Prolonged feelings of uncontrolled stress can progress to underlying inflammatory responses (including the central nervous system and the neuroendocrine system). This, in turn, contributes to imbalances in energetics and difficulty supporting healthy stress and mood responses.

## 3. **SOLUTION: We formulated a product that meets your needs\***

- A unique, first-to-market, plant-based combination of clinically effective adrenal supportive ingredients not previously available in a single formula.\*
- This innovative product brings together a full system of support for balancing adrenal/HPA axis, endocannabinoid system, the immune system and metabolic system responses to help moderate fatigue under stressful conditions.\*
- As an alternative to CBD and hemp oil products, Vegan Adrenal Support+ features copaiba oil, which can more effectively support the CBD endocannabinoid system to recover, reset and rebalance the adrenals, in addition to providing stress, immune, cardiovascular, digestive and antioxidant support.\*
- Broad-spectrum adrenal and stress support.\*
- No animal derived ingredients.

# HOW VEGAN ADRENAL SUPPORT+ WORKS\*

- **Ashwagandha** and **Magnesium** have been clinically studied to support a balanced adrenal response that promotes resiliency in times of elevated feelings of stress and anxiousness. More specifically, ashwagandha may help activate receptors in the CNS to help balance cortisol production and release.\*
- The endocannabinoid system plays an important role in balancing energetics and activation of the metabolic, immune, and central nervous systems. Activation of cannabinoid receptors (CB2) in these systems is critical to encourage the adrenals to reset. **Copaiba Oil** may offer a more efficient activation of CB2 receptors than CBD/hemp oil. Combination effects of Copaiba oil (specific CB2 activator) with **Boswellia** (helps balance endocannabinoid capacity) support a healthy and functional stress response.\*
- **Copaiba Oil** and **Boswellia** provide terpenes and boswellic acids to promote a healthy immune and metabolic response.\*
- Algae-derived or vegan **Omega-3/DHA** provided in the ideal triglyceride form for absorption and tolerance, helps to support and maintain healthy central nervous system function and cellular signaling.\*
- A balanced neuroendocrine system network supports healthful and relaxing sleep cycles for good recovery and optimal functional capacity of the adrenal and immune systems.\*
- A well-recognized adaptogen, **Eleuthero** has been indicated to help moderate corticosterone activity.<sup>4,5</sup> **Corticosterone** promotes the conversion of amino acids into carbohydrates and glycogen stores in the body, thereby supporting optimal energy reserves.
- **Rhodiola Rosea**, contains rosavins and salidroside, to help balance hypothalamic-pituitary-adrenal activity. Rhodiola can have a calming effect on the central nervous system and supports healthy adrenal gland function. In particular, rhodiola may help to moderate mild fatigue under stressful conditions.<sup>6\*</sup>
